For: Mitchell and Antelope Run Roadway Proposal

Blading and wheel rolling Mitchell Ln from Big Chino Rd to Big Sky Ranch Rd.

If watering is required at the time work is performed, there will be an added cost.

On Mitchell Ln north of Antelope Run Rd and north of Ranch House Rd will require fill material. An approximate 2 loads per spot at \$150 per load.

On Mitchell Ln from Big Chino Rd I suggest putting in a culvert for the first two driveways on the right.

If road material is required at the time road work is performed, I will be using 3/8 minus at a cost of \$165 per 17 ton load.

Blading & Wheel Rolling Proposal Total = \$3,000 plus materials required

Antelope Run Rd Proposal

Blading and wheel rolling from Mitchell Ln to High Desert Rd section. This section will require road material to be used 3/8 minus at a cost of \$165 per load. This section will require approximately 8 loads.

I suggest a culvert on second driveway on Antelope Run Rd from High Desert Rd on north side.

Blading & Wheel Rolling Proposal Total = \$1,000 plus materials required

Note: Culverts I suggest should be a minimum of 15". Price per 20' x 15" culvert installed will be \$550 each.

Should you have any questions, please call me at 928-830-2878.

Thank you for your consideration,

Jose Sanchez, Owner
